Professional Summary

Motivated Computer Science student with strong hands-on experience in **Python** and **Django**. Built a full-featured Event Management System with role-based access control, email integration, and PostgreSQL. Passionate about clean code, backend development, and problem-solving — demonstrated through competitive programming and multiple CTF competitions. Seeking a Python/Django internship to contribute effectively while gaining industry experience.

Education

B.Sc in Computer Science & Engineering

Rajshahi University of Engineering & Technology (RUET), Rajshahi

Expected Graduation: 2028

Technical Skills

- **Languages:** Python, C++, C, Java
- **Web Development:** Django, HTML, CSS, Tailwind CSS, JavaScript
- **Databases:** PostgreSQL, MySQL, SQLite
- **Tools & Technologies:** Git, GitHub, Linux, Kali Linux, Pillow, python-decouple
- **Core Concepts:** Object-Oriented Programming (OOP), Data Structures, Algorithms, Role-Based Access Control (RBAC)
- **Other:** IoT (ESP8266), Godot Engine, Shell Scripting

Projects

Event Management System (*Full-Stack Django Application*)

github.com/ridowan01/event-management

- Developed a complete event platform supporting three user roles: Admin, Organizer, and Participant.
- Implemented secure authentication, custom permissions using Django Groups, and Role-Based Access Control.
- Built features including event creation with image upload, category management, participation system, and cancellation.
- Integrated automatic email notifications (SMTP) for participation confirmation and cancellation.
- Used PostgreSQL, Tailwind CSS, Pillow, and environment variables for clean configuration.
- Technologies: **Python, Django, PostgreSQL, Tailwind CSS, JavaScript**

Mythic Odyssey (2D Action RPG Game)

<https://github.com/ridowan01/Mythic-Odyssey>

- Developed a feature-rich 2D top-down action game with character customization, combat, quests, and progression system.
- Technologies: GDScript, Godot Engine

Bus Ticketing System (Desktop Application)

- Built a complete desktop app with admin and user dashboards for ticket booking, schedule management, and earnings tracking.
- Technologies: Java, Java Swing, JavaMail

LPG Supervision System (IoT Project)

<https://github.com/ridowan01/HardwardProjects/tree/main/LpgSuperVision>

- Real-time LPG level monitoring system using NodeMCU (ESP8266) with web dashboard and alert system.
- Technologies: Arduino, HTML, CSS, JavaScript

Achievements & Competitions

- **picoCTF 2026** – Team White Shadows secured **Global Rank 1277** (Score: 5000). As team leader, contributed **2400 points** solving challenges in Forensics, General Skills, Cryptography & Binary Exploitation.
- **RUET Cyber Security Club CTF** – Secured **37th position**.
- **Integrated Hackers Initial CT 2023** – Ranked **121st**.
- Qualified for **Semi-Finals (Round 2)** of SOLVIO AI Hackathon 2025 (Team NeuralNewbies).
- Strong problem-solving background through consistent participation in Codeforces, LeetCode, and CodeChef.

Certifications

- **Competitive Programming** – Phitron (Sep 2025)
- **Linux Server Management and Security** – University of Colorado System (May 2025)
- **Hands-on Introduction to Linux Commands and Shell Scripting** – IBM (May 2025)
- **Networking Fundamentals** – Akamai Technologies (Mar 2025)

Additional Information

- Strong communication and teamwork skills
- Fast learner with attention to clean and maintainable code
- Interests: Backend Development, Cybersecurity, Game Development, Graphic Design
